

What is it?

Ever have that nagging feeling that your home could be more energy efficient? It usually happens when you're watching TV, sitting near a window and that icy cold draft swirls by your head. **This system solves that problem!**

With this O.S.S. system, we'll take a full inventory of your home's energy efficiency. During the process, we'll evaluate the many factors that directly and indirectly contribute to your home's energy efficiency.

THE STEPS:

- 1. Get your Oil Save Score** – Just visit the website and use our easy O.S.S. Calculator. Then, call us to find out how to start saving!
- 2. Interview & Questionnaire** – We'll talk and then, provide a questionnaire to help establish your energy usage history.
- 3. Set Objectives** - review savings, safety, home value, comfort and your other top priorities.
- 4. Perform the inspection at the client's chosen level of service.** (see the 3 options listed)

IMPORTANT QUESTIONS:

Operation Costs:

How much does my present heating system really cost to operate?

Am I allowing money to flow out of my windows, attic, doors or even walls?

Is my furnace inefficient? (causing \$\$ to go up the chimney!) *newer furnaces can offer an average efficiency of around 85% or higher!

Safety:

Are there any hidden dangers in my home?

Is my home as healthy an environment for my family as it could be?

Am I protected by a service plan that will offer me peace of mind 24 hours a day, 365 days a year?

Get your **FREE Phone Consultation** by calling
603-497-4897

or, get your **FREE Information Kit** at
www.putnamfuel.com/OilSaveScore

Choose your Option!

A: Phone Consultation

FREE

Visit our website at www.putnamfuel.com/oilssavescore and download our FREE INFORMATION KIT. We'll e-mail you a questionnaire to fill out and then our client services team will contact you to schedule a phone consultation call, while also introducing all aspects of the program and the options we have available for you.

B: Energy Improvement Inspection

Fee: \$475

Visit our website as in option A, the difference is that within this program, we'll not only provide you with all features of option A, we'll also, schedule your at home inspection. Part of your FREE INFORMATION KIT, is a detailed list of the home/building systems that we will inspect as a part of this process. Upon completion of the inspection, we'll provide both a detailed report as to the current state of your home's energy efficiency, as well as an improvement plan to reduce your energy costs. Please note that our Putnam Oil Save Score™ and Maintenance Service Plans Technicians are well equipped and certified to deliver most home improvement programs that we recommend. For any services that we are not prepared to deliver, we will provide referrals to outside affiliate partners. *see version C.

C: Premium Improvement Inspection

Fee: Estimated

Certain home or office types may require a more custom approach based on many factors - including fuel-type, size or age of home (or business), location and accessibility (to name a few)

3 MAJOR COSTS to YOU!

of a low home energy efficiency score

When your home saves **ENERGY**,
You Save Money!

#1 Your Hard Earned Money

NH sits in the top 3 states in the entire USA that are highly dependent on petroleum due to their heavy dependence on #2 heating oil for the primary source of thermal energy for homes and businesses. Beyond that, ongoing shortages and increased consumption have caused increased costs for you at home.

#2 Family Comfort & Safety

Home heating and cooling systems require maintenance to operate correctly. Since many companies don't offer these services, your system may be creating hazards that are too serious to ignore. From dangerous fumes and air quality pollutants, to fire hazards - it's always worth a service inspection! You want your family to feel comfortable, safe and warm throughout the year. This includes creating efficiency in those very cold months, where less spending, means you'll be more able to afford to keep your family comfortable all year long. Plan ahead and reduce these costs!

#3 Our Natural Global Resources

By taking a full audit of your home's energy use you will be helping us all reduce the depletion of our global fossil fuel and other natural resources. The smaller carbon footprint we create, the healthier all of our families will be. Every home can save!

Thinking Differently about FUEL

You don't need to ask around too much to find a family looking to save on their home heating bill. Oddly, the struggle always seems to be based on buying less. But, what if we all started to look at this a bit differently?

What if we focused on using less and, therefore, keeping more of our fuel?

Add to that peace of mind and confidence that your home is safe and secure and you'll have more energy for other fun family moments!

Do you know your score?
